Subject: LANTEK® II LAN Cable Certifier

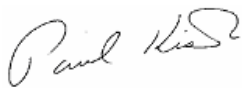

Dear Ed,

Belden has completed the evaluation of Ideal Industries' LANTEK® II-350, LANTEK® II-500 and the LANTEK® II-1000 LAN Cable Certifier for all internal parameters. The parameters for alien crosstalk are still under evaluation. We are pleased to announce the approval of this test equipment for use in channel performance verification up to 500 MHz of Belden's IBDN 1200, 2400, 4800 and 10GX cabling systems.

The evaluation was made in our laboratories using the LANTEK® II-1000 LAN Cable Certifier, firmware version 1.106 and IDC reporting software version 1.1.0.15. The results obtained correlate within the expected accuracy for Level IIIe field testers.

We look forward to continued cooperation with Ideal Industries in the future to evaluate new software updates and product features as they become available.

Sincerely,

Paul Kish
Director, Systems & Standards
